About

I was born in Turin on October 5th, 1991. I received the Bachelor Degree in International Trade from the University of Turin (Italy) in 2013, advised by Prof. Eleonora Isaia. I defended a thesis about new sources of financial intermediation and micro-credit alternatives, entitled "Fostering South - South Investments, empirical study between South Africa and Afghanistan in the Telecommunication business".

Afterwards, I joined a Double Degree Programme at University of Pavia, spending the second year of my Master at the University of Hohenheim (Germany). In December 2015, I received (cum laude) my M.Sc. Degree in Economics from both universities, defending a thesis on dual economy models, advised by Prof. Harald Hagemann and by Prof. Giovanni Vaggi. My thesis work ((here) analysed the Eritrean Manzanar Project in view of the Lewis Model, investigating the increase in productivity in the subsistence sector to prevent internal migration.

Right after my Master, I started working as responsible of the innovation department at Cleopa GmbH, a start-up company located in Berlin, focused on developing and offering energy efficiency solutions. Meanwhile, I got accepted at Sant'Anna-IUSS Doctoral Program in Economics, where I started my Ph.D in October 2016.

Education

- 10/16 - now **Ph.D. Student in** Economics Sant'Anna School of Advanced Studies
The Ph.D. (lasting 4 years) offers to the students one year of intensive course work by an international Faculty composed of permanent staff of both the Scuola Superiore Sant'Anna and IUSS Pavia, and a large group of Visiting Scholars; an heterogeneous mix of innovative and traditional approach is taught in this year. Afterwards, students will proceed with a supervised research work, yielding an original dissertation to be discussed in a final, public examination. It is expected that students will produce articles publishable in international journals
